Dominic Antonino P. Delfin

Full-stack Developer/DevOps Engineer

I'm Dominic, a Software Engineer with experience in full-stack development and DevOps practices, with stronger skills in backend development. I enjoy building and deploying applications, working with tools like Docker, cloud services, and modern web frameworks. I'm interested in understanding how systems work end-to-end, from development to deployment, and I continuously work on improving my problem-solving and technical skills through real projects.

SKILLS

Backend:

Java, Express.js, MySQL, MongoDB, PostgreSQL, Django, Laravel PHP

Frontend:

HTML, CSS, React, Dart, Next.JS, Vue.JS

UI/UX:

Figma, Canva

DevOps:

AWS, Docker, Nginx, Vercel, Railway, Render

Soft skills:

Organization, Communication, Teamwork, Problem-Solving, Adaptability, Time Management

EDUCATION

Bachelor of Science in Computer Science

Ateneo de Davao University (2022-2026)

Certifications

AWS AI Practitioner

CCNA: Introduction to Networks

Work Experience

Arisen Labs Intern | May - July 2025

Company: Ateneo de Davao University

- Contributed to a full-stack web system using Laravel, Vue, and TypeScript, supporting both frontend pages and backend features.
- Collaborated in an agile team environment, developing stronger problem-solving, communication, and end-to-end debugging skills.

SAMAHAN SysDev DevOps Engineer | August 2025 - April 2026

Company: Ateneo de Davao University

- Deploy and manage applications using Docker and Docker Compose in staging and production environments.
- Configure servers and deployment pipelines to ensure applications run reliably and are ready for release.

Projects

AIM Global Citizenship System [Live Website]

Laravel + Vue/Inertia

- Served in a full-stack + UI role, delivering frontend pages, backend endpoints, and workflow automation for a role-based application and evaluation system used by students, staff, committee members, and directors

SAMAHAN Student Portal [Live Website]

Docker, Nginx, SSH, Linux

- Led deployment of the SAMAHAN web platform to production at samahan.addu.edu.ph
- Packaged the application using Docker and managed service coordination on the production server.
- Set up and maintained Nginx as a reverse proxy/web server to route traffic and serve the application reliably

VOLUNTEERING EXPERIENCE

NASA Space Apps Challenge 2025 - Technical Head

- As the Head Technical of the Committee, I was in charge of delegating tasks to my committee members based on their capabilities.

DurianPy - Creatives Member | 2025 - Present

- Assisted in designing promotional and event materials to engage both members and the wider tech community.
- Developed social media graphics and event banners to promote workshops and meetups.
